

Experience

2020 - Present

Erasmus Internship

Product Designer & Front-end Developer at VivaDrive

Warsaw,
Poland 

At VivaDrive I work with the design team developing the UI/UX of the products, doing user tests, prototyping, research, marketing. I am also part of the development team as front end developer using ReactJS.

2018-2019

UI/UX Designer & FrontEnd Developer at Lim9

Madeira,
Portugal 

Worked as graphic, UI/IX designer, product prototyping, 3d modelling, creating social media content, in a way a full stack designer. As for development i was doing front-end development using HTML,CSS, JS and JQuery, focusing on replicating the designs i developed, responsible layouts and fast loading time.

Education

2018 - Present

Master of Interactive Media Design(HCI) at Universidade da Madeira

Madeira,
Portugal 

In my thesis I am studying the impact of augmented reality in educational systems and how can it improve motivation and learning capabilities of students and also make the task easier for teachers. In this project the augmented reality application has a status of 80% as all the algorithms are developed and is missing just feedback and testing to get results.

2015 - 2018

Design Bachelor at Universidade da Madeira

Madeira,
Portugal 

About

I am João, a student, product designer and developer striving to make products easier to use and accessible to everyone.

Skills

Design

Design Thinking
